

# Colloid & Polymer Science

Kolloid-Zeitschrift und Zeitschrift für Polymere  
Official Journal of the Kolloid-Gesellschaft  
Founded by Wolfgang Ostwald 1907,  
continued by F. H. Müller, Marburg 1944–1981

---

## Editors:

Prof. Dr. H.-G. Kilian, Abt. für Experimentelle Physik, Universität Ulm, Oberer Eselsberg, D-7900 Ulm

Prof. Dr. A. Weiss, Institut für Anorganische Chemie, Universität München, Meiserstr. 1, D-8000 München 2

## Regional Editors:

Prof. Dr. B. Lindman, Physical Chemistry 1, Chemical Center, Lund University, P.O. B. 124, S-22100 Lund (Sweden)

Prof. Dr. E. Matijević, Institute of Colloid and Surface Science, Clarkson College of Technology, Postdam N.Y. 13676 (USA)

Prof. Dr. M. Nakagaki, Faculty of Pharmaceutial Sciences, Kyoto University, Sakyo-Ku, Kyoto (Japan)

Prof. Dr. R. H. Ottewill, School of Chemistry, University of Bristol, Cantock's Close, Bristol BS8 1TS (England)

## Editorial Board:

E. W. Fischer-Mainz

R. Hosemann-Berlin/West

H. H. G. Jellinek-Potsdam, N. Y.

G. Kanig-Ludwigshafen

A. Keller-Bristol

J. Koppelman-Leoben

P. Kratochvil-Prag

H. Lange-Düsseldorf

J. Lyklema-Wageningen

W. Pechhold-Ulm

A. Peterlin-Washington

H. Ringsdorf-Mainz

A. Scheludko-Sofia

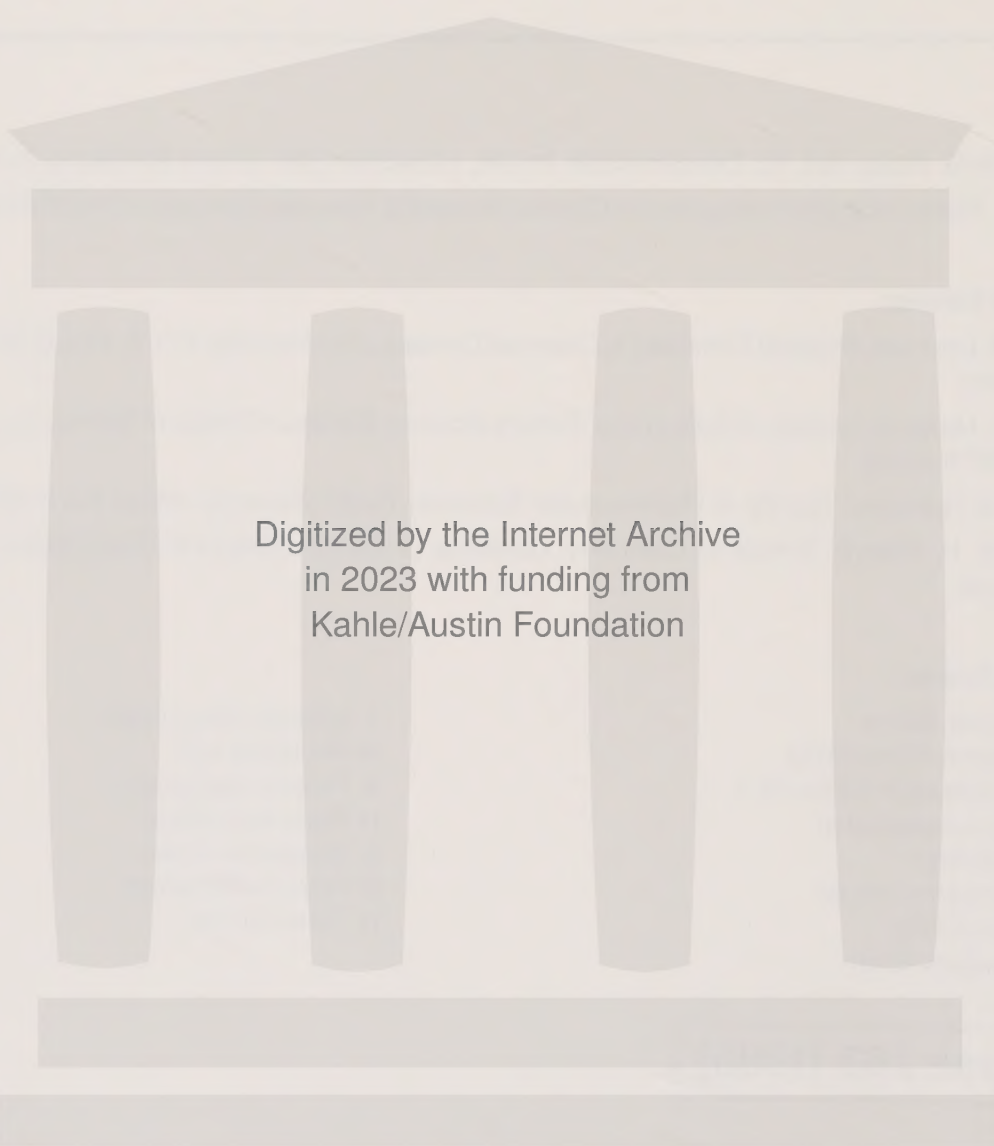

E. Wolfram-Budapest

H. Zahn-Aachen

# CONTENTS OF VOL. 263 (1985)

## Polymer Science

Baltá-Calleja FJ, Kilian H-G: A novel concept in describing elastic and plastic properties of semicrystalline polymers: polyethylene. . . . .	697
Bonart R, Owen AJ, Paulus I: Elementarerweichungen in Amorphen Polymeren . . . . .	435
Born L, Hespe H: On the physical crosslinking of amine-extended polyurethane urea elastomers: A crystallographic analysis of bis-urea from diphenyl methane-4-isocyanate and 1,4-butane diamine. . . . .	335
Ehinger K, Summerfield S, Roth S: Electrical conductivity of polyacetylene: nonsolitionic mechanism. . . . .	714
Endres B, Garbella RW, Wendorff JH: Studies on phase separation and coarsening in blends of poly(vinylidene-fluoride) and poly(ethyl-acrylate) . . . . .	361
Fronk W, Wilke W: Small angle Scattering of partially oriented polymers: model calculations with monoclinic macrolattice . . . . .	97
Furasawa K, Tagawa T: Adsorption behavior of water soluble polymers with lower critical solution temperature . . . . .	353
Garbacz J, Paukszta D: Influence of additives on the structure and properties of polymers — 3. Study of $\beta \rightarrow \alpha$ -transition in isotactic polypropylene at various temperatures and times of heating . . . . .	985
Geigenfeind R, Owen AJ: On the morphology of oriented nylons-12 . . . . .	116
Gölz W: Water-tree growth in low density polyethylene . . . . .	286
Heinrich W, Stoll B: Dielectric investigation of the glass relaxation in poly(vinyl acetate) and poly(vinyl chloride) under high hydrostatic pressure. . . . .	873
—, —: Dielectric relaxation in two liquid crystalline polyacrylates under high hydrostatic pressure. . . . .	895
Holl B, Kilian H-G, Yeh GSY: The maximum melting temperature in strain-crystallized van der Waals networks . . . . .	313
Hopfenmüller MK, Menauer GM, Göritz D: On the inhomogeneous deformation of rubber-elastic polymers. . . . .	388
Ichida T, Tsuji M, Murakami S, Kawaguchi A, Katayama K: Thickening process of polyethylene single crystals at an early stage of annealing — II. Computer simulation of lamellar thickening. . . . .	293
Interthal W, Wilski H: Drag reduction experiments with very large pipes . . . . .	217
Jacobasch H-J, Bauböck G, Schurz J: Problems and results of zeta-potential measurements on fibers . . . . .	3
Kausch HH: Stress-transmission through chain molecules. . . . .	306
Kawaguchi A, Isoda S, Petermann J, Katayama K: Some aspects of doping mechanism in Polyschwefelnitrid (SN) <sub>x</sub> . . . . .	631
Keller A, Odell JA: The extensibility of macromolecules in solution; a new focus for macromolecular science . . . . .	181
Kilian H-G: An interpretation of the strain-invariants in largely strained networks . . . . .	30
—, Unseld K, Jaeger E, Müller J, Jungnickel B: Characterization of polyethylene networks based on the jointed description of melting, swelling and deformation . . . . .	607
Killmann E, Bergmann M: Fraction of H-bonded segments of N-ethylpyrrolidone, oligomeric and polymeric vinylpyrrolidone adsorbed from CHCl <sub>3</sub> on silica measured by IR spectrometry . . . . .	372
—, —: Microcalorimetric studies of the adsorption of N-ethylpyrrolidone, oligomeric and polymeric vinylpyrrolidone from CHCl <sub>3</sub> on silica . . . . .	381
Kock HJ, Rehage G: Orientational birefringence of uniaxially compressed PMMA networks in the unswollen state . . . . .	708
Krenzer E, Ruland W: Lattice defects in poly(p-phenylene-terephthalamide) fibers . . . . .	554
Kresteva M, Nedkov E, Radilova A: Melting of nascent and thermally treated super-high molecular weight polyethylene . . . . .	273
Krysztafiewicz A, Domka L, Wieczorek W: The modified talcs as semi-active fillers of rubbers . . . . .	804
Kulicik W-M, Hörli H-H: Preparation and characterization of a series of poly(acrylamide-co-acrylates), with a copolymer composition between 0–96.3 mol-% acrylate units with the same degree and distribution of polymerization . . . . .	530
Kurematsu K, Koishi M: Kinetic studies on void formation during liquid epoxy resin impregnation through polyester non-woven fabric . . . . .	454
—, —: Pressure dependence of liquid epoxy resin impregnation through polyester non-woven fabric in vacuum . . . . .	638
La Mantia FP, Valenza A, Acierno D: Dielectric properties of LDPE/Ny6 blends . . . . .	726
Leung WM, Axelson DE, Syme D: Determination of charge density of anionic polyacrylamide flocculants by NMR and DSC —: Studies of low molecular weight polyethylene single crystals by differential scanning calorimetry. . . . .	812
Lin SB, Hwang KS, Tsay SY, Cooper SL: Segmental orientation studies of polyether polyurethane block copolymers with different hard segment lengths and distributions . . . . .	128
Lindner P, Oberthür RC: Shear induced deformation of polystyrene coils in dilute solution from small angle neutron scattering . . . . .	443
Marr-Leisy D, Neumann R, Ringsdorf H: The comparative spreading behavior of enantiomeric and racemic tyrosine amphiphiles . . . . .	791
Matsuzawa S, Yamaura K, Tanigami T, Higuchi M: The thermal transition behavior of poly(bis(p-fluorophenoxy)phosphazene) . . . . .	888
Maurer FH, Kosfeld R, Uhlenbroich Th: Interfacial interaction in kaolin-filled polyethylene composites. . . . .	624
Michler GH: Electron microscopic investigations of the structure of crazes in polystyrene. . . . .	462
Mitchell GR, Windle AH: Diffraction from thermotropic copolyester molecules . . . . .	230
—, —: The effect of annealing on the local structure of glassy polycarbonate. . . . .	280
Nagy M: Some new aspects of research on polymer gels . . . . .	245
Nedeltscheva M, Mladenova S, Valcheva E: Investigating the kinetics of the adsorption process of polyamideamine on cellulose . . . . .	720

Neuert R, Springer H, Hinrichsen G: Orientation analysis of uniaxially drawn polystyrene films doped with fluorescent molecules by fluorescence polarization, UV- and IR-dichroism and birefringence. . . . .	392
Nierlich M, Boue F, Lapp A, Oberthür R: Characteristic lengths and the structure of salt free polyelectrolyte solutions. A small angle neutron scattering study . . . . .	955
Nurul Huda M, Dragaun H, Bauer S, Muschik H, Skalicky P: A study of the crystallinity index of polypropylene fibres . . . . .	730
Oprea CV, Popa M: Mechanochemical reactions on poly(vinyl chloride) – 15. Molecular aspects of PVC deformation under tensile stress conditions . . . . .	25
–, –, Ioanid A, Bfrsănescu P: Mechanochemical reactions on poly(vinylchloride) – 16. Behaviour under static tensile stress of PVC modified with benzidine . . . . .	738
Owen AJ: A matrix shear model to describe, the orientation behaviour of segmented, polyurethane elastomers . . . . .	991
–: Some dynamic mechanical properties of microbially produced poly- $\beta$ -hydroxybutyrate/ $\beta$ -hydroxyvalerate copolymers . . . . .	799
Peterlin A: The concentration dependence of the diffusion and permeability in a homogeneous membrane – I. The Fickian and chemical potential formulation of the diffusion current . . . . .	35
–: The concentration dependence of the diffusion and permeability in a homogeneous membrane – II. The differences between the Fickian and chemical potential formulation in the case of a linear increase of the sorption coefficient with the equivalent penetrant pressure . . . . .	42
Pfandl W, Schwarzl FR: Relation between rheological properties and the molecular weight distribution of a technical polystyrene . . . . .	328
Privalko VP, Tarara AM: Structure-Property relationship for carbochain fluoropolymers . . . . .	322
–, Lipatov S, Mirontsov LI, Dashevskii LI: Thermoelastic properties of segmented polyurethaneureas . . . . .	691
Prokopová E, Stern P, Quadrat O: Rheological investigation of aqueous solutions of poly(vinyl alcohol) during ageing – I. Changes in non-Newtonian viscosity in normal stress . . . . .	899
Puggelli M, Gabrielli G: Binary systems in monolayers: Polymethylmethacrylate and ionizable low molecular weight compounds. . . . .	879
Reutner P, Luft B, Borchard W: Compound formation and glassy solidification in the system gelatin-water . . . . .	519
Sawatari C, Matsuo M: Dynamic mechanical behavior of ultradrawn polyethylene films produced by gelation/crystallization from solution . . . . .	783
Scherz D, Hinrichsen G: Change of structure and orientation of semicrystalline drawn poly(ethylene-terephthalate) films on simultaneous thermal and mechanical treatment . . . . .	973
Schmidt G, Enkelmann V, Westphal U, Dröschner M, Wegner G: Preparation of urea-poly(tetrahydrofuran) complexes and their application for fractionation of oligomers . . . . .	120
Shibanov YuD, Godovsky YuK: Phase separation and glass transition point versus composition diagrams of binary mixtures with covalent bond between components. . . . .	202
Shirahama H, Suzawa T: Adsorption of bovine serum albumin onto styrene/acrylic acid copolymer latex . . . . .	141
Simha R, Jain RK: On the equation of state of polymer solutions . . . . .	905
Simionescu CrI, Popa MI, Dumitriu S: Bioactive polymers – XXI. Coupling of chloramphenicol on Biozan R . . . . .	620
Theocaris PS: Phase transformation, at the boundary layers between polymers, and solid surfaces. . . . .	863
Tieke B: Solid state polymerization of butadienes. Polymerization of long chain derivatives of sorbic and muconic acid . . . . .	965
Wenderoth K, Karbach A, Petermann J: Charakterisierung der Matrix in eigenfaserverstärkten PB-1-Filmen . . . . .	301
Yeh GSY, Chen CJ, Boose DC: Radiation-induced crosslinking: Effect on structure of polyethylene. . . . .	109
Zosel A: Adhesion and tack of polymers: Influence of mechanical properties and surface tensions . . . . .	541

## Colloid Science

Ali S, Bettelheim FA: Non-freezing water in protein solutions. . . . .	396
Baglioni P, Dei L, Puggelli M: Bidimensional mixtures of polymethylmethacrylate with fatty esters at water-air interface. . . . .	266
Bilke S, Klose G: Order parameters and molecular shapes of phosphonic acid dialkyl esters in a uniaxial hydrophobic environment. A theoretical study. . . . .	1031
Börngen L, Nimitz G, Ghyczy M, Hager J: Small angle X-ray and dielectric data of soybean-phosphatidylcholine Phospholipon® 100. . . . .	686
Borsa J, Pak S, Iijima T: Equilibrium sorption of C.I. Basic Red 18 by carboxymethyl cellulose membranes . . . . .	842
Boyle MH: The electrical properties of heterogeneous mixtures containing an oriented spheroidal dispersed phase. . . . .	51
Bratko D, Vlachy V: An application of the modified Poisson-Boltzmann equation in studies of osmotic properties of micellar solutions . . . . .	417
Clausse M, Zradba A, Nicolas-Morantini L: Water/ionic surfactant/alkanol/hydrocarbon systems. Realms-of-existence and transport properties of microemulsion type media . . . . .	767
D'Alagni M, Forcellese ML, Giglio E: Study of the interaction between an optical probe and micelles of sodium deoxycholate . . . . .	160
Dickinson E, Stainsby G, Wilson L: An adsorption effect on the gel strength of dilute gelatin-stabilized oil-in-water emulsions . . . . .	933
Dörfler H-D, Brezesinski G, Nuhn P, Rüger HJ, Kertscher P: Kopfgruppeneinfluss homologer 1,2-Dihexadecylglycerophospholipide auf die Phasenumwandlungen ihrer Phospholipid/Wasser-Mischungen im heterogenen Zweiphasengebiet . . . . .	570
–, Rettig W, Sackmann H: Penetration of sodium cetyl sulfate into monolayers of 1,2-dipalmitoyl- and 1,2-dimyristoyl-phosphatidylethanolamine . . . . .	563

Fornés JA: Secondary minimum analysis in the DLVO-theory . . . . .	1004
Friberg E, Wohn CS: A system with non-aqueous birefringent microemulsions . . . . .	156
Genz A, Holzwarth JF: Laser temperature jump experiments with fluorescence polarization and turbidity detection on the phase transition of single shell vesicles of dimyristoylphosphatidylcholine . . . . .	484
Grigorov L, Radoev B: On the mechanical equilibrium in anisotropic heterogeneous systems . . . . .	594
Harding IH: Amphoteric polystyrene latex colloids: polymerization pathway and the control of particle size and potential . . . . .	58
Henze R, Schreiber U: Dielectric relaxation measurements on aerosol-OT/water/cyclohexane-solutions at low water content . . . . .	164
Hidalgo-Alvarez R, Delgado A, Callejas J, González-Caballero F: Electrophoretic behaviour of calcium oxalate monohydrate in liquid mixtures . . . . .	941
Hrust V, Kallay N, Težak Dj: Precipitation and association of silver laurate in aqueous solutions . . . . .	424
Imae T, Ikeda S: Formation of rodlike micelles of dimethyleyleamine oxide in aqueous solutions: effects of addition of HCl and NaCl on the micelle size and the intermicellar interaction . . . . .	756
Ishikawa A, Hanai T, Koizumi N: Dielectric properties of ion-exchange beads of sulfonic acid type dispersed in aqueous solutions — effect of fixed charge density . . . . .	428
Jachowicz J, Berthiaume M, Garcia M: The effect of the amphiprotic nature of human hair keratin on the adsorption of high charge density cationic polyelectrolytes . . . . .	847
Jaroniec M, Goworek J, Dąbrowski A: Analysis of the excess isotherms of adsorption from solutions on solids in order to determine the capacity and thickness of the surface phase . . . . .	771
Kamphuis H, Jongschaap RJJ: The rheological behaviour of suspensions of fat particles in oil interpreted in terms of a transient-network model . . . . .	1008
Kellner BMJ, Czornyj G: A novel method for determining the melting behavior of ultrathin films . . . . .	413
Kertes AS, Tsimering L, Garti N: Enthalpies of solution in sodium octanoate + water + alcohol mixtures . . . . .	67
Klose G, Bayerl T, Stilbs P, Brückner S, Zirwer D, Gast K: Diffusion in three and four component microemulsions containing nonionic surfactant studied by pulsed field gradient nuclear magnetic resonance and quasi-elastic light scattering . . . . .	81
Klotz M-L, Klotz G, Zahn H: Gewinnung und Charakterisierung von nichtkeratinarmer Wolle — ein Modellpräparat für die Grundlagenforschung von textilchemischen Ausrüstungsprozessen . . . . .	654
Mileva E, Radoev B: Hydrodynamical interaction of two emulsion droplets at small separations . . . . .	587
Miller R, Dukhin SS, Kretzschmar G: On the theory of adsorption kinetics of ionic surfactants at fluid interfaces — 2. Numerical calculations of the influence of a quasiequilibrium electric double layer . . . . .	420
Monasse B, Haudin JM: Growth transition and morphology change in polypropylene . . . . .	822
Mühle K: Particle adhesion in coagulation and bridging flocculation . . . . .	660
Müller BW, Merz J, Müller RH: Simultane Bestimmung von elektrophoretischer Beweglichkeit und Teilchengröße bei überlagerter Konvektion an Suspensionen und Emulsionen . . . . .	342
Nakamura N, Kamitake Y: Dipole moments of $\alpha$ , $\omega$ -dibromoalkanes . . . . .	475
Nishida K, Ando Y, Yoshida H, Satake A: Interaction of 5-fluorouracil with sodium poly- $\alpha$ , L-glutamate . . . . .	682
Peiffer DG, Lundberg RD: Rheology of water-in-water suspensions formed with lightly sulfonated ionomers . . . . .	173
Piasecki A, Burczyk B: Chemical structure and surface activity — VII. Adsorption of mono- and disubstituted 1,3-dioxacyclanes at the aqueous solution-air interface . . . . .	996
Ponter AB, Yekta-Fard M: The influence of environment on the drop size — contact angle relationship . . . . .	673
Radeva Ts, Stoylov S: Unusual dispersion of the electro-optically determined electric polarizability of bentonite dispersed particles in the range 10 kHz–1 MHz . . . . .	501
Rettig W, Dörfler H-D, Koth Chr: Entmischungerscheinungen in binären Monoschichten des Systems Dimyristoylkephalin/Dipalmitoyl-N-methylkephalin, untersucht mittels verschiedener Spreitungs- und Oberflächentechniken . . . . .	647
Ruiz-Hitzky E, Rojo JM, Lagaly G: Mechanism of the grafting of organosilanes on mineral surface — III. Interlamellar grafting of layer silicic acids . . . . .	1025
Sasaki S: Friction coefficients of spheres having sticky or hairy surfaces . . . . .	935
Sato S, Kishimoto H: Spreading of dipalmitoyl phosphatidylcholine on the surface of sodium deoxycholate aqueous solution . . . . .	399
Senō M, Noritomi H, Kuroyanagi Y, Iwamoto K: Conformational studies of the oligomers of L-lysine in reversed micelles . . . . .	923
Snabre P, Grossmann GH, Mills P: Effects of dextran polydispersity on red blood cell aggregation . . . . .	478
—, Mills P: Effect of dextran polymer on glycocalyx structure and cell electrophoretic mobility . . . . .	494
Tagawa M, Inoue T, Ogi N, Nakagaki M: Steric stabilization of iron(III) hydroxide sols by various amino acids . . . . .	406
Tieke B, Weiss K: Amphiphilic diacetylenes with pyridine and 2,2'-bipyridine headgroups — Polymerization properties in the crystalline state, in LB-multilayers, and in complexes with transition metal salts. Morphology of polymerized multilayers . . . . .	576
Tong HM, Gryte CC: Mechanism of lamellar spacing adjustment in directionally frozen agar gels . . . . .	147
Tsutsumi K, Mitani Y, Takahashi H: Estimation of heat of adsorption from energy distribution on heterogeneous surfaces by a theoretical analysis of adsorption process . . . . .	832
—, —, —: Evaluation of energy distribution on a heterogeneous surface from heat of adsorption and its application to the ammonia/Na-Y zeolite system . . . . .	838
—, Takahashi H †: Studies of surface modification of solids — IV. Immersional heats and infrared spectra of organosilane-treated silica . . . . .	506
Varbanov R: The determining role of three-phase contact mobility and contact angle magnitude in the selectivity of a flotation process . . . . .	75

Watase M, Nishinari K: Differential scanning calorimetry and large deformation behaviour of kappa-carrageenan gels containing alkali metal ions . . . . .	744
Wüstneck R, Zastrow L: Characterization of the interaction between gelatin and a spread monolayer of octadecanoic acid — 2. The influence of a gelatin-surfactant solution on the surface rheology of a spread octadecanoic acid monolayer . . . . .	778
Yato A, Papadopoulos KD: An algorithm for estimating colloidal heterointeractions base on decoupling the Poisson-Boltzmann equation . . . . .	913
Zasępa W, Buczkowska D: The influence of the addition of electrolytes on the degree of dispersion of silver iodide hydrosol . . . . .	928
Zastrow L, Wüstneck R, Kretzschmar G: Characterization of the interaction between gelatin and a spread monolayer of octadecanoic acid — 1. The influence of a gelatin-surfactant solution on the dynamic behaviour of a spread <sup>14</sup> C-labelled octadecanoic acid monolayer . . . . .	749

## Short Communication

Gustafsson S, Karawacki E, Krüger JK, Pietralla M: Thermal conductivity of <i>n</i> -Tetracosan around the liquid-liquid transition temperature $T_u$ . . . . .	603
Li W, Gu T: Equilibrium contact angles as a function of the concentration of nonionic surfactants on quartz plate . . . . .	1041
Matsumoto M, Kaisheva M: The adsorption of nonionic surfactant on the sessile mercury electrode in a thin liquid film . . . . .	512
Miyamoto S, Tagawa M: Measurements of the desorption rate of sodium dodecyl sulfate from nylon particles by the stopped-flow method . . . . .	597
Mosler E, Folkhard W, Knörzer E, Nemetschek-Gansler H, Nemetschek Th, Koch MHJ: Localization of stress-induced molecular rearrangements in collagen . . . . .	87
Wood JA, Seddon AB: The solubility of zinc dodecanoate in xylene and tetrachloromethane . . . . .	600

## Laudatio

Herrn Professor Dr. Richard Bonart zum 60. Geburtstag . . . . .	1
---	---

Erratum . . . . .	435

## Supplements to appear in 1985

Progress in Colloid & Polymer Science, Vol. 70  
 "Surfactants, Adsorption, Surface Spectroscopy  
 and Disperse Systems"  
 Guest Editors: B. Lindman (Lund), G. Olofsson (Lund),  
 P. Stenius (Stockholm)

Progress in Colloid & Polymer Science, Vol. 71  
 "Frontiers in Polymer Science"  
 Guest Editor: W. Wilke (Ulm)
